Help me play my first real money hand

This document explains what to do when you want to play your first real money poker hand.

Step 1 – Practice

- A. If you are new to online games you should do some practice with free play money on our play money tables and/or through our freeroll tournaments (20 pr day) first.
- B. Launch your player software from the desktop of your computer (must install first) and log into your account or use our web client at www.DailyPoker.com/en/Poker/Poker-Web-Client.aspx
- C. Click the fun money tab and choose a table from the list in the middle of the screen. Go to table.
- D. Choose a seat and start playing to familiarize yourself with how the game works.
- E. You could also try a freeroll tournament with real cash prizes. Go back to the lobby and click on the “tournaments” tab – and thereafter the tab Freeroll/VIP beneath.
- F. Double click on any of the scheduled freeroll tournaments to open the tournament lobby and register for the freeroll. Your table in the tournament will pop up once the tournament starts.
- G. You can participate in as many freerolls as you want.

Step 2 – Deposit funds to your account

- A. If you haven't won real money from freerolls you can deposit funds to play with real money.
- B. Go to the website DailyPoker.com - click “cashier”. Choose a deposit option and deposit funds.
- C. You can also transfer to the poker networks bank account (accounts in many countries). You can find information about how to do this from our FAQ at DailyPokerMagic.com – look after “How to make a bank transfer” under general.

Step 3 – Choose your game and play

- A. When you want to play real money hands you choose the tab “cash games” from the software lobby. Choose game type by clicking the various tabs on the upper part of the lobby screen. You can narrow the selection of tables by using the filter to the far right of the lobby screen. Select a table in the main window and join the table to play as you did with play money.
- B. If you want to play real money tournaments click on the tab called “tournaments”. You can sort the types of tournaments from the sub tabs. You can narrow the selection of tournaments further by using the filter to the far right of the lobby screen.
- C. Choose a tournament, which vary in prize pools from €25 to above €100.000.
- D. DailyPoker guaranties total tournament prize pools of at least €1.600.000 every month!

Step 4 – Check your statistics

- A. Once you have played your first real money hand or real money tournament you are invited to a special €3.200 freeroll (Magic freeroll). You are also able to view many stats about your game and commission from your website profile. Log into your concept account and check your profile. Statistics updates once every 24 hours (approximately at 09:00 CET).

Notes

- You can find poker schools from your player account - under the tab poker from the website www.DailyPoker.com and from the resource centre of your Magic account (www.DailyPokerMagic.com)!
